

Shell Programming

A Necessity for all Programmers

Displaying file contents

Nagesh Karmali | Firuza Karmali

Department of Computer Science and Engineering
IIT Bombay

You will learn to ...

- Display first or last N lines of a file
- Display contents on the terminal part by part

- **head**: Displays first 10 lines
- **tail**: Displays last 10 lines
- Option: **-N**: Displays only N lines (first/last)

- **more** and **less**: Displays contents on the terminal (part by part)
- Navigation
 - Enter key: Scroll down (line)
 - Space bar key: Next page
 - b key: Previous page

Now, you can ...

- Display file contents on the terminal

Thank you
