

# Shell Programming

A Necessity for all Programmers

## Scope of Variable and Return in Functions

Nagesh Karmali | Firuza Karmali

Department of Computer Science and Engineering  
IIT Bombay

# You will learn to ...

- Define local and global variables
- Write functions that return a value

- Global
  - Value can be accessed outside the function
  - Default
- Local
  - Value can be accessed only within the function
  - **typeset**

- Returns value
- Examined using: **\$?**

# Now, you can ...

---

- Define local and global variables
- Write functions that return a value

# Thank you
