Shell Programming

A Necessity for all Programmers

For loop and more

Nagesh Karmali | Firuza Karmali

Department of Computer Science and Engineering
IIT Bombay

You will learn to ...

- for loop
- break and continue

Introduction to for loop

- Repeats for a list of items
- Instead of a condition
- Structure
  ```
  for VARIABLE in LIST
  do
      ...
  done
  ```

Break and Continue

- break: Exit the loop
- continue: Ignore the remaining statements and iterate next

Now, you can …

- Iterate over items in a list using for loop
- Exit the loop when a condition is satisfied
- Iterate next and ignore the remaining statements

Thank you
